EDUCATION

Nigerian Army University Biu
Bsc. Software Engineering

Biu Borno, Nigeria
Nov 2021 – Dec 2024

SKILLS SUMMARY

- **Languages:** TypeScript/JavaScript, HTML, CSS, Node, CSS, Tailwind
- **Frameworks:** Nextjs/React, Nestjs
- **Tools:** Redux, Zustand, Mongoose, Git, Prisma, Drizzle
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **Soft Skills:** Problem solving, Team work, Excellent Communication

WORK EXPERIENCE

FULL STACK DEVELOPER | CONTRACT | ETIJAR

- Developed React Native mobile app for peer-to-peer debt recording and settlement, enabling users to borrow, lend, and track debts with amount, repayment date, and reminders.
- Built Node.js backend with MongoDB to manage transactions, wallet balances, and payment plans. Implemented contact selection from phone contacts, automated zakat calculation, and WhatsApp reminders for debtors.

FULL STACK DEVELOPER | CONTRACT | TERRAPROP

- Engineered web portal for advanced property management using Next.js and Nest.js, focusing on access control, maintenance requests, and document management.
- Developed tenant and guest access control with one-time codes and WhatsApp integration for gate security. Implemented maintenance request workflows with handyman selection, rating, and notifications.
- Created secure document repository for property profiles and sales handover processes.

FULL STACK DEVELOPER | CONTRACT | KLEENOS

- Developed frontend user interfaces using Nextjs following designed wireframes ensuring responsiveness across all platforms.
- Build maintainable server-side application using Nestjs and Node, MongoDB and leveraging Mongoose ensuring clean & clear schematic approach in the database design.
- Integrated the APIs built & implemented user authentication for different user type using Kinde. ○ Integrated payment gateway (Paystack) ○ Ensuring the application meets accessibility and compliance standards.

FRONTEND DEVELOPER | FULL TIME | SLEM TECH. LTD

- Developed user interfaces of the application using Nextjs.
- Write clean and maintainable code using TypeScript, HTML, Tailwind.
- Collaborating with designers to ensure UI/UX requirements are met.
- Working closely with backend developer to integrate APIs into the application.
- Optimizing frontend performance and ensuring the application meets compliance standard.

PROJECTS

ETIJAR | “In Testing Phase”

- Peer-to-peer lending & debt-tracking mobile app (React Native, Nest.js, MongoDB)
- Core features: debt recording, repayment tracking, zakat calc., WhatsApp reminders.

TERRAPROP | [LINK](#)

- Advanced property-management portal (Next.js, Nest.js)
- Features: guest code generation, maintenance request tracking, secure doc storage.

KLEEN-OS | [LINK](#)

- Advanced property-management portal (Next.js, Nest.js)
- Automated invoice generation, cutting manual work by 50%
- Seamless booking & payment flow → 30% boost in positive feedback
- Marketplace for discovering & booking cleaning services; role-based access via Kinde
